

Manual LED BONDIC® Pro:

Batteries (4xLR44) are included!

- Remove the battery fuse before use by unscrewing the battery compartment and removing the small plastic slice
- Changing the battery: unscrew the compartment, remove the batteries including the plastic tube, slide the batteries out of the tube and insert new batteries there (in the same direction!). Insert the tube including batteries into the lamp body, making sure that the polarity is correct. Screw the cover on tightly.
- Switch the lamp on / off by pressing the switch

General SAFETY and WARNINGS LED BONDIC® and LED BONDIC® Pro

- Do not operate the device in rooms where there are flammable substances or mixtures.
- Do not look directly into the light beam
- Store in a dry and dust-protected place.
- Do not immerse in water or in contact with moisture.
- Do not drop, this could damage it.
- Do not convert or modify the device, only use original parts.
- Please read the assembly and operating instructions before use.

Intended use

The LED BONDIC® (Pro) is intended for the curing of light-curing plastics. Any other or additional application is not intended and no liability is assumed for any damage resulting from this.

Disposal

The LED BONDIC® (Pro) must not be treated as household waste, but must be returned to a collection point for electrical and electronic devices.
